# Konstantyn Agapov

## Full stack javascript web developer

## TECHNICAL SKILLS

HTML5, CSS3, Responsive Design, Material-UI, Bootstrap, Javascript, ES6, React, Redux, Formik, AXIOS, HTTP requests, REST API, GraphQL, Apollo, Node, Express, Typescript, Git, MongoDB,  Jest, Mocha

## SUMMARY

Result-oriented professional in web product building, expertise in front end as well as back end development, proficient in modern JavaScript frameworks. Motivated and smart working team player.

## EXPERIENCE

**CSI WORKS** | *Front-end web developer*            **September 2019 - present**

- Build reusable components with React, use hooks to control the state, update UI through the element's lifecycle, implement API calls, listening to DOM events such as scroll, clicks, etc.
- Utilize CSS FlexBox and Grid for creating complicated layouts such as navigations and image galleries, use media queries for responsive and friendly layout on different devices. Add styles with Styled Components for faster development inside JS file.
- Use frameworks such as Material-UI, Bootstrap, for fast interface prototyping, and great UX.
- Create controlled forms with FORMIK library, implement input validation, error handling.
- Set up routing with React Router, for single page application (SPA), provide a better experience navigating the website without having to send requests for new pages, including nested routes.

**Alvil** | *Front-end web developer*            **May 2018 - August 2019**

- Migrated existing JQuery code to React app for better performance and code maintaining.
- Used Material-UI tables with pagination and sorting, tree view side navigation menu.
- Handled HTTP requests for CRUD operations with AXIOS.
- Wrote unit tests with Jest library to ensure proper functionality after a code update.

## EDUCATION

**University of California San Diego Extension Coding**            **November 2019**
**Bootcamp |** *Certificate of completion Full Stack Web Development*

- An  intensive program focused on technical programming skills in HTML5, CSS3, Javascript (closures, prototype, callbacks, promises, error handling), JQuery, Bootstrap, Handlebars, Node, MySQL, MongoDB, Express & React.

**Kyiv University of Tourism, Economics and Law, Kyiv,**            **August 2011**
**Ukraine |** *Tourism and Travel Services Management*
